

Eagle Echoes

Roundstone Elementary students were excited to have a dance instructor recently from the Arthur Murray Dance Studio, located in Lexington.

Lisa Midkiff Sullivan taught 4th and 5th grade students several ballroom dances, including The Rhumba, Foxtrot, Cha Cha and Swing. The students had a fun time learning while also reviewing the dance elements from the Arts and Humanities curriculum.

Lisa's husband, Ronald Sullivan, was an assistant instructor.

Roundstone Elementary would like to thank the following businesses

and individuals for supporting our attendance project:

Kwik Mart, Steve Ponder Construction, Rockcastle Hospital, Citizens Bank, Robinson Stone Company, Attorney Willis Coffey, NAPA Auto Parts, Berea National Bank, Sparks Flowers and More, Lakes Funeral Home, Parsons Gas and Appliance, Attorney William Gregory, Mary Oldfield, D.M.D., P.S.C., Kentucky Farm Bureau, Pepsi, Ford Brothers, Inc., Burdette Law Offices, Dowell and Martin LLC, Mobley's Electrical Service.

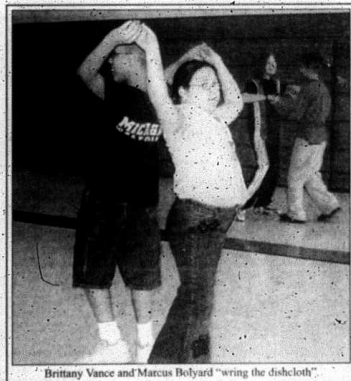

We appreciate your support. Thank you!

Ms. Lisa Reams assists Jeremy Miller and Ashley Partin.

Lisa Sullivan and Molly Coffey get into the "swing of things".

Brittany Vance and Marcus Bolyard "wiring the dishcloth".

Jaleah Owens practices with Ronald Sullivan.

Rachelle Cromer and Andrew Pensol.

Parkey and Woodall helping to improve Science and Math programs in Appalachia

Terry Parkey and E. Harold Woodall, of Rockcastle Co., have been selected to improve math and science education programs in Appalachia as a Regional Teacher Partner through the Master Teacher project.

As one of only six regional teacher partners in the Commonwealth, Parkey will work with selected school districts in the Appalachian region to support mathematics and science instructional reform.

The Master Teacher project, an innovative program administered by the University of Kentucky, provides schools in 66 counties, 35 of which are in eastern Kentucky, with instructional resources and leadership to improve mathematics and science education. Program improvement is tailor-made for particular schools' needs. The math and science curriculums in schools in Appalachia are reviewed and assessed, strengths and weaknesses are identified, and suggestions for improvement are made.

Regional Teacher Partners aid in instruction and guidance of teachers, administrators, and personnel, serving as core components of math and science program development. Their work at the district and school level includes such activities as professional development training, school and district planning, curriculum design, and program evaluations.

The project, directed by Kim Zeldner, resource collaborative director at UK, is under the umbrella of the Appalachian Research Systemic Initiative (ARSI), an educational initiative headed up by Winthier-Royner, Ph.D., Professor Emeritus, UK College of Arts and Sciences. The Master Teacher project is funded by the National Science Foundation (NSF), and is one of only five similar programs funded within the United States.

"These teachers serve as real leaders in instructional reform. We feel very fortunate to have had such a competitive pool of applicants and to have been able to receive commitments from such dedicated and talented educators as our six selections," said Zeldner. "This is a project whose success will depend a great deal upon the Regional Teacher Partners themselves, so I feel especially fortunate to have such a great team with which to work."

To learn more about ARSI and the Master Teacher project, visit www.arsl.org.
